RESEARCH

- 2014-Present Co-Investigator, Cognition in Context Lab
This collaborative program of research, conducted with Wythe Whiting, Ph.D., investigates the effects of cellphone-related auditory distractions on cognitive performance and physiological activation.
- 2011-Present Principal Investigator, Technology and Health Lab
This program of research investigates links among cellphone use and aspects of health and well-being such as sleep quality, mental health, and academic functioning.
- 2010 Co-Investigator, The Blue Ridge Girls Pilot Study
This collaborative study was conducted with Dr. Megan Fulcher and a research team of four undergraduate summer research scholars. This pilot study examined psychosocial functioning during the transition to adolescence and involved girls living in a rural environment and their mothers.
- 2007 Co-Investigator, The Transitions Project Pilot Study
The Transitions Project Pilot Study was conducted collaboratively with Dr. Megan Fulcher and a research team of six undergraduate summer research scholars. The goal of this study was to explore how young adolescents’ engagement in ideas, relationships, and activities may promote a sense of purpose and protect against psychosocial languishing or maladjustment during the transition through pubertal development.
- 2001-2005 Principal Investigator, Children's Health in Context Project
The NIH-funded Children's Health in Context (CHIC) Project was a short-term longitudinal study of 8-10 year-old urban children who had been diagnosed with asthma. The primary goal of this study was to examine connections between children's multiple caregivers (i.e., primary caregiver, secondary caregiver, teacher, and health care provider).
- 1999-2001 Principal Investigator, UMass Boston Children's Health Project

- The Children's Health Project (CHP) was a short-term longitudinal pilot study examining factors promoting resiliency among 8-10 year-old children with asthma living in low-income, urban neighborhoods.
- 1998-2000 Co-Director, UMass Boston Families Coping with Divorce Project
The Families Coping with Divorce research team developed a parent education curriculum and manualized program suitable for empirical evaluation. The program was developed in English and Spanish.
- 1992-1997 Graduate Research Assistant, University of Georgia Family Health Project and Correlates of Family Functioning Project
The *Family Health Project* was a CDC-funded longitudinal study of African American families coping with maternal HIV infection in stressed urban environments. The *Correlates of Family Functioning Project* was a CDC-funded national multi-site study of families coping with hemophilia and HIV infection.
- 1990-1992 Research Associate, University of Pittsburgh Medical Center (Western Psychiatric Institute and Clinic) Childhood Obesity Program
Under the supervision of Leonard Epstein, Ph.D., I assisted in the implementation and empirical evaluation of a family-based behavioral treatment program for childhood obesity.
